

## **2012 Dissertation Intern Program**

The Research Department of the Federal Reserve Bank of Kansas City offers a paid internship to a Ph.D. candidate at the stage of writing a dissertation in the field of macroeconomics, monetary economics, or international economics. The intern will have the opportunity to interact with professionals in a stimulating research environment and to attend the Department's invited seminar series. Students conducting computationally intensive research will find particularly attractive the availability of high-performance computer facilities. For more detailed information on the Research Department and the Federal Reserve Bank of Kansas City, please visit <http://www.kansascityfed.org/research/>.

The internship will take place between June and September, 2012, for 8 to 10 weeks (dates are flexible). The internship will pay \$30.00 per hour and include a domestic airfare for one round trip between his or her principal residence and Kansas City. The intern will pay his or her own living expenses. The Department will provide office space, a computer, and technical support. The intern is expected to make significant progress on his or her dissertation, and to give one or more seminars highlighting progress made.

Applications are open to Ph.D. candidates from all Ph.D.-granting colleges and universities. Applicants must have already passed their qualifying examinations and be at the dissertation stage of their program. To apply, candidates should send their curriculum vitae, their dissertation proposal, samples of research (if applicable), and have a letter of recommendation sent directly by their principal academic adviser.

Applications should be sent via **email** to:

Dissertation Intern Recruiting Group
