Pairwise Flows between Metropolitan CBSAs (ranks 1 to 64 of 243): Notes: Outflow rates are measured by residents commuting to a place-of-employment in the paired metropolitan CBSA as a share of employed residents in the origin CBSA. Inflow rates are measured by workers commuting from the paired metropolitan CBSA as a share of employment in the destination CBSA. The 243 pairs are all those for which the sum of the inflow and outflow rates exceeds 0.05.

Pairwise Flows between Metropolitan CBSAs (ranks 129 to 192 of 243): Notes: Outflow rates are measured by residents commuting to a place-of-employment in the paired metropolitan CBSA as a share of employed residents in the origin CBSA. Inflow rates are measured by workers commuting from the paired metropolitan CBSA as a share of employment in the destination CBSA. The 243 pairs are all those for which the sum of the inflow and outflow rates exceeds 0.05.

Pairwise Flows between Metropolitan CBSAs (ranks 193 to 243 of 243): Notes: Outflow rates are measured by residents commuting to a place-of-employment in the paired metropolitan CBSA as a share of employed residents in the origin CBSA. Inflow rates are measured by workers commuting from the paired metropolitan CBSA as a share of employment in the destination CBSA. The 243 pairs are all those for which the sum of the inflow and outflow rates exceeds 0.05.
