Proportion of “Farm Dependent” Counties and Agricultural Banks

Source: BEA.
A 3rd consecutive year of a “downturn” in the ag economy.

Supply factors at play year-to-year, but demand strength likely the long term driver.

Recent global and macroeconomic developments have shaped the set of concerns in the ag economy.

Financial stress among ag borrowers and ag lenders could be more pronounced in the near future.
Farm income has dropped sharply from recent highs, along with crop prices.

Outside of agriculture, the last three years have also been notable for the global economy.

- Fiscal challenges
- Monetary policy divergence
- Oil price collapse
- Exchange rate volatility
- Renewed China concerns
- Global financial market turmoil
- _rexit?
Global economic growth has been sluggish the last few years.

Global Real GDP Growth

* Forecast
Source: IMF April 2016 Update
U.S. growth has been slightly better, driven by the strength of the consumer.

U.S. labor markets have improved steadily, but have wobbled recently.

Sources: Bureau of Labor Statistics and Haver Analytics.
Monetary policy remains very accommodative.

Federal Funds Target Rate

Sources: Federal Reserve Board and Haver Analytics
Inflation has been persistently low, both in the U.S. and abroad.

**Inflation Indexes**

Source: Haver Analytics.
Despite a modest rebound, low energy prices have kept inflationary pressures subdued.

Sources: EIA and Haver Analytics.
The dollar has weakened some in 2016, but the gains of recent years have kept U.S. inflation low.
The dollar has surged even more dramatically against regions competing for ag exports.

Currency Exchange Rates

How might a changing interest rate environment affect the ag economy?
Farm interest rates have increased, but only slightly.

Interest Rates on Non-Real Estate Farm Loans
First Quarter

Source: Agricultural Finance Databook, Table A.5
Interest expenses, however, are small when compared to fluctuations in commodity prices.

U.S. Corn Producers - Interest Expenses and Price Fluctuations

Cents per Bushel

- Average Annual Interest Payment
- Average Daily Price Change
- Average Monthly Price Change

Sources: USDA, barchart.com and author’s calculations.
Concluding Points

• Farm income has continued to weaken with low commodity prices.
  • Supply-side headwinds: strong U.S. and global production.
  • Demand-side headwinds: ethanol blend wall, export markets and China.
    • Biofuel exports may be a longer-term boost.

• Effects of the downturn in the farm economy:
  • Tightening credit conditions.
  • Pressure on cash rents and farmland values.
  • Consolidation (opportunities for some).
  • Accelerating decline in rural, agricultural areas.
