The Structure of the Federal Reserve System

- The Federal Reserve System was created by Congress in 1913.

- It is a public-private, decentralized institution consisting of the Board of Governors in Washington, D.C. and 12 regional Reserve Banks.
  - Board of Governors
    - Consists of seven members who are appointed by the President and confirmed by the Senate to serve 14-year terms.
    - There are currently five members of the Board of Governors: Jerome Powell, Michelle Bowman, Lael Brainard, Richard Clarida and Randal Quarles.

- Regional Federal Reserve Banks
  - There are 12 Regional Reserve Banks, each serving a unique district. These are semi-independent by design.
  - The Reserve Banks are governed by their Board of Directors, and the Directors (excluding Banking Directors) select the President of the Bank.

- Federal Open Market Committee (FOMC)
  - Comprised of the 7 members of the Board of Governors and the 12 Reserve Bank Presidents (only 5 presidents are voting members on a rotating basis).
  - Charged with conducting monetary policy.
Regional Federal Reserve Banks and Branch Locations
The Primary Functions of the Federal Reserve System

• Conduct the Nation’s Monetary Policy
  – The Federal Open Market Committee is the group charged with conducting monetary policy within the U.S.
  – The Committee has a statutory mandate from Congress to promote maximum employment, stable prices and moderate long-term interest rates.

• Provide and Maintain an Effective and Efficient Payments System
  – The Federal Reserve supplies payments services to the public through depository institutions including banks, credit unions and savings and loans.
  – We also serve as a banking and fiscal agent for the United States government.
  – Payment services includes cash processing, processing and clearing checks, transferring funds and issuing, transferring and redeeming U.S. government securities.

• Supervise and Regulate Banking Operations
  – The Federal Reserve ensures the safety and soundness of banks and ensures that banks provide fair and equitable services to consumers.
  – The Federal Reserve also monitors and promotes the stability of the financial system as a whole.
The U.S. economy is expected to expand at a moderate pace this year.

“Consistent with its statutory mandate, the Committee seeks to foster maximum employment and price stability. In light of the implications of global developments for the economic outlook as well as muted inflation pressures, the Committee decided to lower the target range for the federal funds rate to 1-3/4 to 2 percent.”
