

Economic Outlook

January 2024

Economic Outlook Themes

- Headline inflation has continued to decline aided by lower oil prices and weaker food and goods inflation.
- Core inflation, which excludes food and energy, has also come down, but by less, as the decline in services inflation has been more gradual.
- Overall, against the backdrop of positive inflationary readings over the past couple of months, the Committee marked down its median projection for the funds rate.

Inflation has continued to ease.

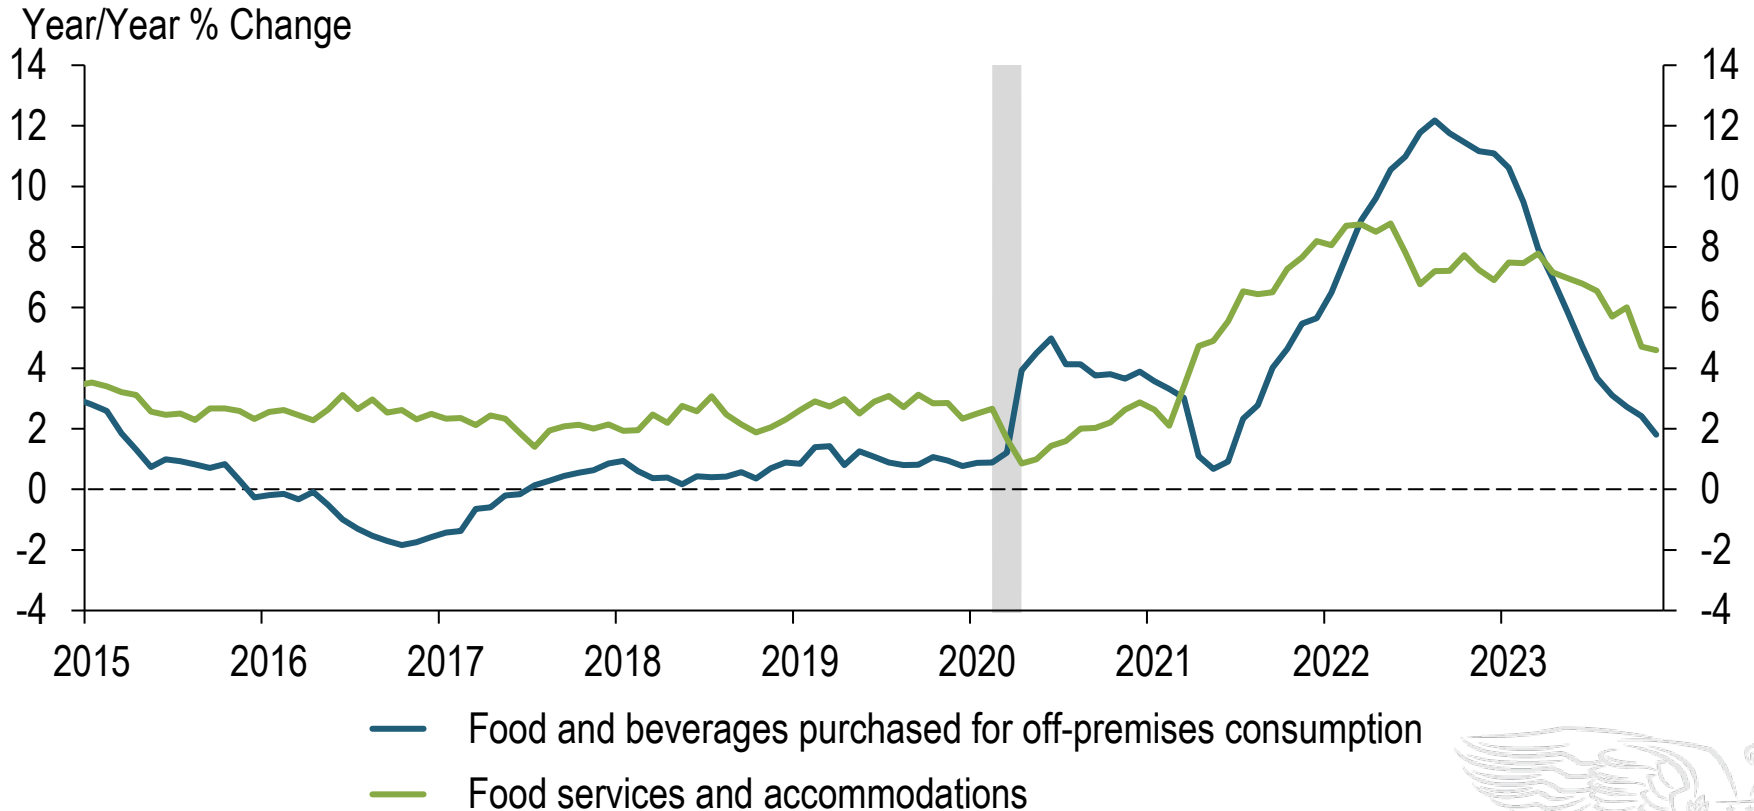

Year/Year % Change

Lower oil prices have helped, but their drag is unlikely to continue.

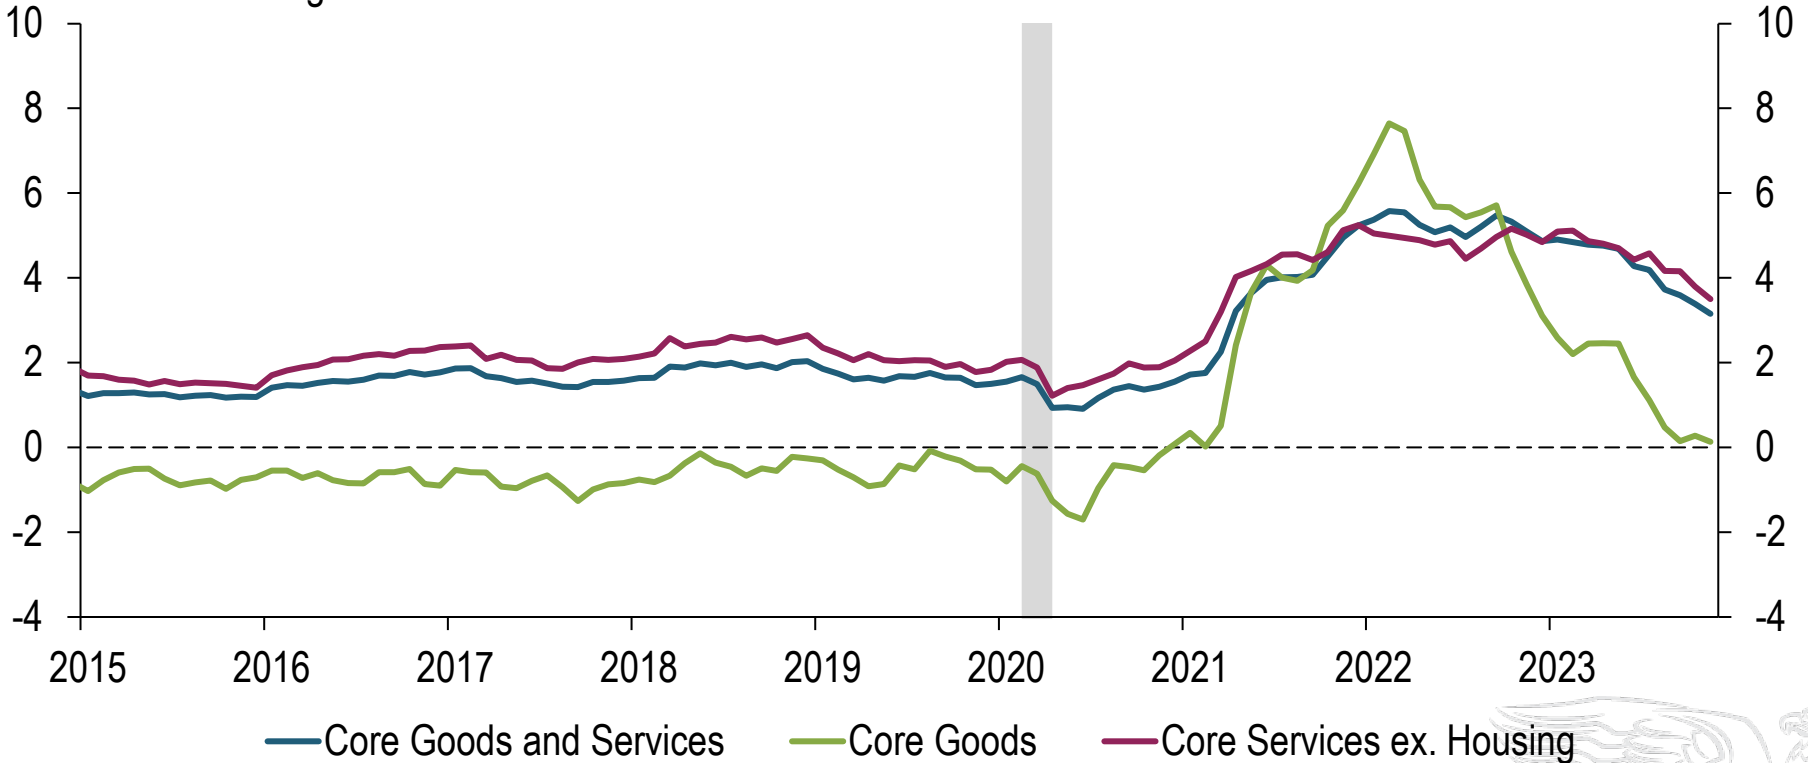

Food inflation has declined, especially for food consumed at home.

Core inflation has fallen less due to services inflation.

Year/Year % Change

The stubbornness of services inflation is related to the only gradual loosening of the labor market.

Indeed, the KC Fed's labor market conditions indicators suggest labor market activity is only slowly returning to historical norms.

The loosening labor market has helped bring down wage inflation.

Year/Year % Change

Labor productivity has also improved, which has brought down labor costs.

Year/Year %

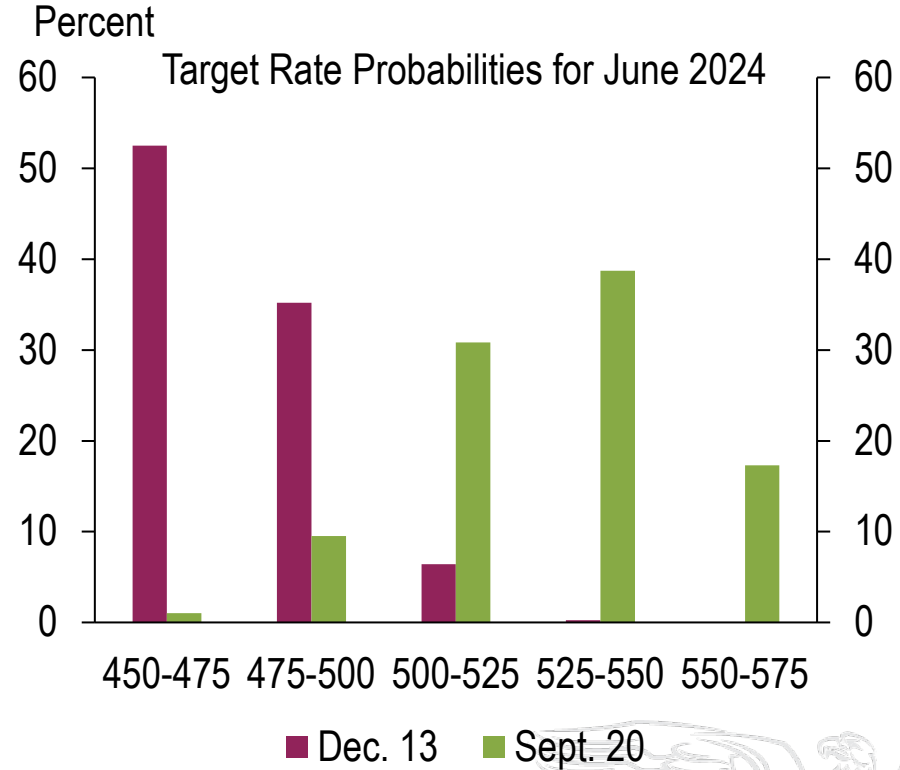

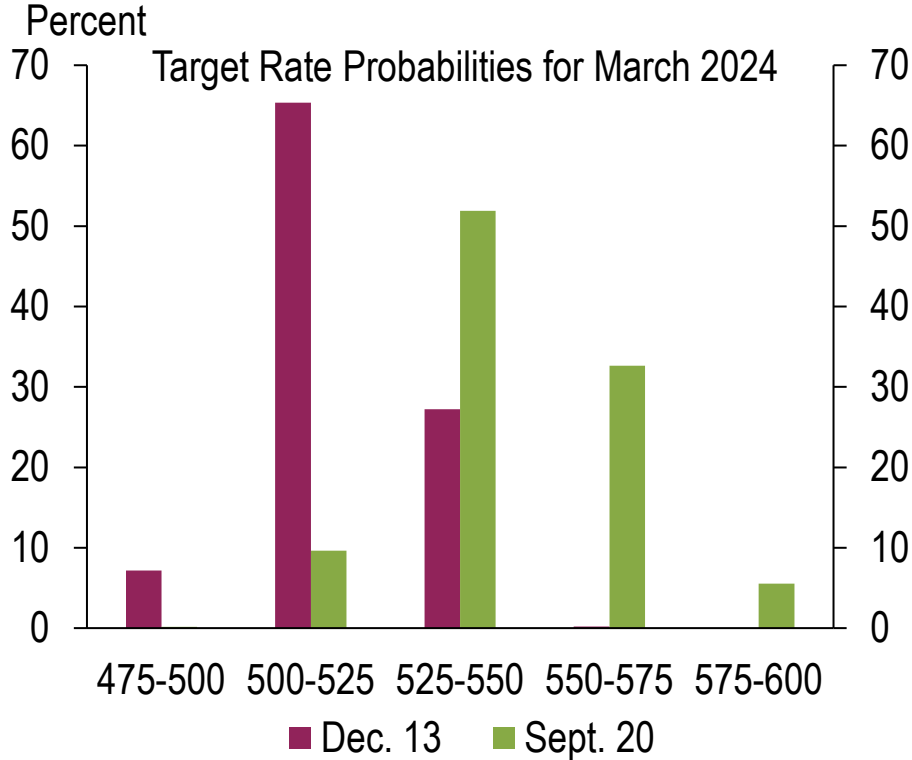

Year/Year % Change

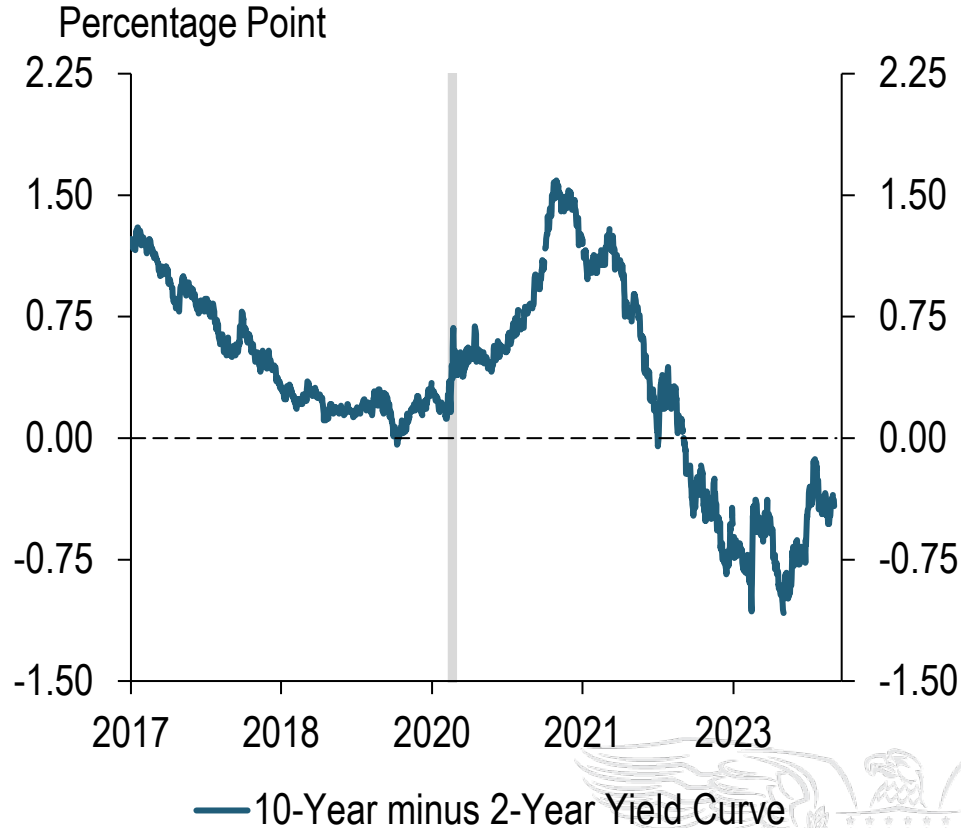

Overall, the string of positive inflation readings led the Committee to mark down its policy path.

Market expectations of future policy actions have shifted.

Longer-term interest rates have retreated.
