KANSAS CITY, Mo. – The Federal Reserve Bank of Kansas City released the March Manufacturing Survey today. According to Chad Wilkerson, vice president and economist at the Federal Reserve Bank of Kansas City, the survey revealed that Tenth District manufacturing activity grew solidly compared to a month ago and a year ago with positive expectations for future activity.

“Regional factories continued to report solid growth in March,” said Wilkerson. “Materials prices remain extremely high for most firms. However, many manufacturers have been able to pass through at least a portion of the price increases on to customers.”

Historical data, results from past surveys and release dates for future surveys can be found at
