

Studio 10 video: Technology on the farm

July 14, 2021

Learn how one farmer uses technology to boost profitability and adapt to changes.

To illustrate a topic highlighted during the Kansas City Fed's Agricultural Symposium, Bank videographers Brett Smith and Kevin Wright traveled to Spencer Farms in Ottawa, Kansas to learn how technology affects productivity in agriculture.

Owner and operator Kevin Spencer, who runs Spencer Farms with his sons, Brad and Aaron, described the impact of technology in use today:

- [Boosting profitability through technology](#)
- [Using technology to analyze yields and adapt to changes](#)
