

Money Museum

To Splurge or Save

July 26, 2021

Test your financial fitness!

Do you **NEED** to buy it, or do you just really want it? At the Money Museum, you will find several exhibits like this on display to help kids and those who are young at heart strengthen their financial fitness.

At the Kansas City Fed, we believe that kids of all ages should understand how to smartly spend and save. While here, you will begin to recognize the differences between your needs, how to invest in yourself and your career, and how to safely store and budget your money with your local bank.

The lessons don't end there! Check out our [Economic Education](#) page to learn more about budgeting, finance, and economics.
