**KANSAS CITY, Mo.** - The Federal Reserve Bank of Kansas City released the [July Manufacturing Survey](#) today. According to Chad Wilkerson, vice president and economist at the Federal Reserve Bank of Kansas City, the survey revealed that Tenth District manufacturing activity increased further, with solid expectations for future activity over the next six months.

“Regional factory activity continued to expand in July and expectations remain positive,” said Wilkerson. “However, 89% of firms reported supply chain issues and 91% reported labor shortages. Many manufacturers have increased overtime for current workers and are raising starting wages to attract applicants.”

Historical data, results from past surveys and release dates for future surveys can be found at
