KANSAS CITY, Mo. – The Federal Reserve Bank of Kansas City released the [January Manufacturing Survey](#) today. According to Chad Wilkerson, senior vice president at the Federal Reserve Bank of Kansas City, the survey revealed that Tenth District manufacturing activity was flat, and expectations for future activity moderated slightly.

“Regional factory activity was basically flat in January,” said Wilkerson. “However, expectations for future activity were still positive, and many firms expected employment levels to increase over the next six months.”

A summary of the January survey is attached. The January survey incorporates new seasonal adjustment factors using Census X-13 ARIMA-SEATS, so historical indexes differ slightly from previously released numbers. The new seasonal factors will be used throughout 2023. Historical data, results from past surveys, and release dates for future surveys can be found at <https://kansascityfed.org/surveys/manufacturing-survey/>.

The Federal Reserve Bank of Kansas City serves the Tenth Federal Reserve District, encompassing the western third of Missouri; all of Kansas, Colorado, Nebraska, Oklahoma and Wyoming; and the northern half of New Mexico. As part of the nation’s central bank, the Bank participates in setting national monetary policy, supervising and regulating numerous commercial banks and bank holding companies, and providing financial services to depository institutions.
