KANSAS CITY, Mo. – The Federal Reserve Bank of Kansas City released the [November Manufacturing Survey](#) today.

According to Megan Williams, associate economist and survey manager, the survey revealed that Tenth District manufacturing activity fell slightly this month, while expectations for future activity rose.

“Regional factory activity decreased modestly this month, although it is down substantially from this time last year,” said Williams. “However, employment stayed steady, and firms expect increases in production, new orders, and employment in the next six months.”

A summary of the survey is attached. Historical data, results from past surveys, and release dates for future surveys can be found at <https://kansascityfed.org/surveys/manufacturing-survey/>.

The Federal Reserve Bank of Kansas City serves the Tenth Federal Reserve District, encompassing the western third of Missouri; all of Kansas, Colorado, Nebraska, Oklahoma and Wyoming; and the northern half of New Mexico. As part of the nation’s central bank, the Bank participates in setting national monetary policy, supervising and regulating numerous commercial banks and bank holding companies, and providing financial services to depository institutions. More information is available online at www.kansascityfed.org.
