KANSAS CITY, Mo. – The Federal Reserve Bank of Kansas City released the [January Manufacturing Survey](#) today. According to Megan Williams, associate economist and survey manager, the survey revealed that Tenth District manufacturing activity fell at a steady pace, but expectations for future activity remained positive.

“Regional factory activity contracted modestly in January,” said Williams. “However, capital expenditures remain unchanged from this time last year, and firms expect increases in activity in the next six months.”

A summary of the January survey is below. The January survey incorporates new seasonal adjustment factors using Census X-13 ARIMA-SEATS, so historical indexes differ slightly from previously released numbers. The new seasonal factors will be used throughout 2025. Historical data, results from past surveys, and release dates for future surveys can be found at <https://kansascityfed.org/surveys/manufacturing-survey/>.

The Federal Reserve Bank of Kansas City serves the Tenth Federal Reserve District, encompassing the western third of Missouri; all of Kansas, Colorado, Nebraska, Oklahoma and Wyoming; and the northern half of New Mexico. As part of the nation’s central bank, the Bank participates in setting national monetary policy, supervising and regulating numerous commercial banks and bank holding companies, and providing financial services to depository institutions. More information is available online at www.kansascityfed.org.
