KANSAS CITY, Mo. – The Federal Reserve Bank of Kansas City released the [April Services Survey](#) today. According to Megan Williams, associate economist and survey manager, the survey revealed that Tenth District services activity increased modestly in April, and expectations for future activity are still positive.

“Regional services grew slightly in April,” said Williams. “Most contacts expect increased or steady activity in the near future, but many have marked down their expectations for demand and report much more uncertainty since the beginning of the year.”

A summary of the April survey is below. The April survey incorporates new seasonal adjustment factors using Census X-13 ARIMA-SEATS, so historical indexes differ slightly from previously released numbers. The new seasonal factors will be used throughout 2025. Historical data, results from past surveys and release dates for future surveys are available at www.kansascityfed.org/surveys/services-survey/.

The Kansas City Fed’s monthly Survey of Tenth District Services provides information on several indicators of activity including sales, revenue, employment and capital spending, while identifying changes in prices of input materials and selling prices. Survey participants represent a variety of industries, including retail and wholesale trade, automobile dealers, transportation, information, high-tech and professional services, real estate, education, restaurants, health services, tourism and other services firms.

The Federal Reserve Bank of Kansas City serves the Tenth Federal Reserve District, encompassing the western third of Missouri; all of Kansas, Colorado, Nebraska, Oklahoma and Wyoming; and the northern half of New Mexico. As part of the

nation's central bank, the Bank participates in setting national monetary policy, supervising and regulating numerous commercial banks and bank holding companies, and providing financial services to depository institutions. More information is available online at www.kansascityfed.org.
