

LMCI suggest the level of activity increased and momentum remained high in May

June 10, 2019

LMCI suggest the level of activity increased and momentum remained high in May.

The Kansas City Fed Labor Market Conditions Indicators (LMCI) suggest the level of activity increased modestly and momentum remained high in May. The level of activity indicator increased in May from 0.95 to 1.00, while the momentum indicator was little changed at 1.03.

The table in the current release shows the five labor market variables that made the largest contributions to the increase in the activity indicator over the last six months and the five variables that made the largest positive contributions to the momentum indicator in May 2019. The activity indicator increased 0.14 over the last six months. The largest contributor to the increase in the level of activity was job leavers. Fourteen variables made a positive contribution, one variable made no contribution, and nine variables made a negative contribution. The momentum indicator was 1.03 in May, where the largest contributor to momentum was initial claims. Fifteen variables made a positive contribution, and nine variables made a negative contribution.
