In the Tenth Federal Reserve District  
September 2014

Executive Summary

- Surveys were emailed to community depository institutions (including banks, credit unions, and savings and loans) with assets less than $1 billion (December 31, 2013) located in the Tenth District.
- Of the 1,071 potential respondents, 179 institutions completed the survey, resulting in a response rate of 16.7 percent.
- Survey respondent characteristics closely align with the characteristics of institutions located in the Tenth District, although the survey does not represent a random sample.

- New Mexico: 2.2%
- Oklahoma: 20.9%

Tenth District Community Depository Institutions Surveyed:
- Wyoming: 4.4%
- Colorado: 13.4%
- Kansas: 27.9%

Respondent Statistics:
- Asset Size:  
  - < $100 Million: 44%  
  - $100 - $500 Million: 49%  
  - $500 Million - $1 Billion: 7%  
  - Median Asset Size: $119 Million
**COMMUNITY BANKING CHALLENGES**

- **Significant Community Banking Challenges**
  - **Increasing Earnings**: 0% in 2004, 10% in 2008, 20% in 2011, 30% in 2014.
  - **Maintaining Noninterest Income**: 30% in 2004, 40% in 2008, 50% in 2011, 60% in 2014.
  - **Strengthening Net Interest Margin**: 40% in 2004, 50% in 2008, 60% in 2011, 70% in 2014.
  - **Meeting Regulatory Requirements**: 60% in 2004, 70% in 2008, 80% in 2011, 90% in 2014.

Note: 2004 and 2008 only included banks as respondents.

**COMPLIANCE**

- **Respondents spend the most time on compliance with mortgage regulations**, as indicated by the full time equivalent staff members dedicated to compliance and the overall expenses attributed to compliance activities. This is consistent with the 2011 survey results.
- **While mortgage regulation compliance is already rated most expensive and time consuming**, the number of full time equivalent staff members dedicated to compliance is expected to increase by 37% over the next three years, while total expenses are expected to rise by 91%.
- **Deposit account compliance is the second most time consuming compliance activity and third most expensive.** Time spent on deposit account compliance is expected to increase 22% over the next three years.
- **Senior management and board of directors’ attention to compliance is also expected to increase,** as reported by 93% of respondents.
- **Not only are more staffing resources expected, almost 90% of respondents also expect an increase in training expenses and technology software upgrades over the next three years.**
COMMUNITY BANKING CHALLENGES (Continued)

Impact Of Mortgage Lending Regulations

- 68% of respondents indicate 1-4 family mortgage lending is a significant business line for their organization. The Ability to Repay and Qualified Mortgage rules will have little effect on them continuing to offer qualified mortgages over the next three years.
- In contrast, 15% of respondents plan to no longer offer non-qualified mortgages, particularly loans exceeding the debt-to-income ratio (26%) and loans exceeding limits of fees/points (16%), due to the Ability to Repay and Qualified Mortgage rules.

EARNINGS

- Noninterest income is expected to grow over the next three years as indicated by 47% of respondents. The increase in noninterest income is primarily driven by service charges on deposit accounts, debit card fee income, and debit card interchange income.

- Changes to fee structures are also anticipated, where nearly half of all respondents expect checking account maintenance, overdraft, and per item fees to increase over the next three years.
- Over two-thirds of respondents expect overall noninterest expense to increase over the next three years. This increase is being driven primarily by a rise in salaries / employee benefits and data processing (81% and 64% of respondents expect an increase, respectively).

Anticipated Increases To Noninterest Expense
Over Next Three Years
THE FUTURE OF COMMUNITY DEPOSITORY INSTITUTIONS’ BALANCE SHEETS

Overall, increasing loans is the main driver for respondents that are seeking to expand operations over the next three years (132 respondents). Achieving economies of scale followed as a distant second, with 86 respondents indicating it as a primary driver.

INVESTMENTS

20% of respondents anticipate the level of investments (relative to total assets) to increase over the next three years, compared to 29% expecting a decrease in the level of investments. The decline in the investment portfolio is expected to be centered in MBS and municipal securities.

LOANS

Expected Loan Type Emphasis Change Over Next Three Years

Over the next three years, about half of all respondents plan on increasing their emphasis in farm loans and 1-4 family residential loans (retained).

Although mortgage compliance is challenging and requires many resources, only 10% of respondents expect an emphasis decline in their 1-4 family real estate loan portfolio.

LIABILITIES

40% of respondents expect retail customer average CD balances to increase over the next three years. This is followed by expected increases in business demand deposit balances and Federal Home Loan Bank advances.

Retail customers’ average demand deposit balances and CD balances are expected to decline over the next three years, as indicated by over 22% of respondents.

Very little change in funding is expected in the sales of loans to third parties / securitization and brokered deposit levels.
COMPETITION FOR COMMUNITY DEPOSITORY INSTITUTIONS

- More aggressive pricing by existing bank and nonbank competitors is the most critical factor impacting future competition.

DEPOSITS
- Over half of the respondents expect deposit competition to increase from credit unions, community banks, and regional financial institutions over the next three years.

LOANS
- Over half of the respondents expect loan competition to increase from farm credit associations, credit unions, specialized finance companies, community banks, and regional financial institutions.
- Approximately two-thirds of respondents expect business lending competition to increase from community banks, regional financial institutions, farm credit associations, and credit unions.
FUTURE OF COMMUNITY DEPOSITORY INSTITUTIONS

Future of Community Banks
Strategic Direction
Over Next Three Years

- In spite of the challenges, 84% of respondents are probable to remain under the same ownership and structure during the next three years (with an additional 8% stating that it is at least a possibility).
- 29% of respondents believe it is either possible or probable that they will merge or sell to another organization or ownership group. Of this group, only 9% indicate this strategy as probable.

Reasons For Optimism In The Future Of Community Banking

- Relationship banking
  o Understanding of customers and communities
  o Loyalty and support from bank customers
- Superior customer service
  o Can provide personalized service to their customers
  o Provide support for small businesses in their communities
- Resilient business model which has overcome past challenges

New products being explored:
- Person-to-person payments
- Identity theft protection
- Mobile banking
- Remote deposit capture
- Mobile payments
- Email/wireless banking alerts
- Online loan applications
- Stored value/prepaid cards
