# The Structure of the Federal Reserve System

- The Federal Reserve System was created by Congress in 1913.
- It is a public-private, decentralized institution consisting of the Board of Governors in Washington, D.C. and 12 regional Reserve Banks.
  - Board of Governors
    - Consists of seven members who are appointed by the President and confirmed by the Senate to serve 14-year terms.
    - There are currently three members of the Board of Governors: Jerome Powell, Lael Brainard and Randal Quarles.
  - Regional Federal Reserve Banks
    - There are 12 Regional Reserve Banks, each serving a unique district. These are semi-independent by design.
    - The Reserve Banks are governed by their Board of Directors, and the Directors (excluding Banking Directors) select the President of the Bank.
  - Federal Open Market Committee (FOMC)
    - Comprised of the 7 members of the Board of Governors and the 12 Reserve Bank Presidents (only 5 presidents are voting members on a rotating basis).
    - Charged with conducting monetary policy.

# The Primary Functions of the Federal Reserve System

- Conduct the Nation's Monetary Policy
  - The Federal Open Market Committee is the group charged with conducting monetary policy within the U.S.
  - The Committee has a statutory mandate from Congress to promote maximum employment, stable prices and moderate long-term interest rates.
- Provide and Maintain an Effective and Efficient Payments System
  - The Federal Reserve supplies payments services to the public through depository institutions including banks, credit unions and savings and loans.
  - We also serve as a banking and fiscal agent for the United States government.
  - Payment services includes cash processing, processing and clearing checks, transferring funds and issuing, transferring and redeeming U.S. government securities.
- Supervise and Regulate Banking Operations
  - The Federal Reserve ensures the safety and soundness of banks and ensures that banks provide fair and equitable services to consumers.
  - The Federal Reserve also monitors and promotes the stability of the financial system as a whole.

U.S. economic growth accelerated in 2017, and solid growth is expected to continue this year.

\*Projections as of March FOMC meeting; median projections

“In view of realized and expected labor market conditions and inflation, the Committee decided to raise the target range for the federal funds rate to 1-1/2 to 1-3/4 percent. The stance of monetary policy remains accommodative, thereby supporting strong labor market conditions and a sustained return to 2 percent inflation.”
