

Steve Schmalz, *Solution Architect, RSA, The Security Division of EMC*

Mr. Schmalz assists organizations in understanding their security architecture needs and how RSA's security products can help protect their critical infrastructure. Mr. Schmalz has spoken at multiple venues on topics ranging from standards compliance to cryptography. He is a longtime participant in ASC X9 and is a member of X9 F6, where he is technical editor for a new tokenization standard.

Before joining RSA, he was director of business development at Quantrad, a biometrics vendor. He also worked for the National Security Agency as a cryptographic mathematician.
