**Global Exports**

*Ten-Year Index of Growth, Seasonally Adjusted*

June 2015		
	United States	Oklahoma
Exports (Millions)	\$127,690.7	\$418.4
<i>Change from</i>		
Last Month	1.1%	4.8%
Last Year	-5.4%	-21.1%
Share of U.S. Activity		0.3%

2014		
Exports as a	United States	Oklahoma
Percent of GDP	9.4%	3.4%

**Oklahoma Exports Year-to-Date through 2015Q2**

*Percent Change Year-over-Year*

Top Markets	Share
1 Canada	29.2%
2 Mexico	9.8
3 Germany	5.6
4 China*	4.7
5 Singapore	4.6
6 Japan	4.4
7 Netherlands	2.9
8 Australia	2.7
9 United Kingdom	2.0
10 Iraq	1.9

Top Exports	Share
1 Machinery (Except Electrical)	26.6%
2 Computers & Electronics	13.4
3 Transportation Equip.	12.8
4 Fabricated Metal Products	12.2
5 Electronic Equip. & Appliances	7.6
6 Chemicals & Rare Earth Materials	7.0
7 Food	5.5
8 Plastics & Rubber Products	3.8
9 Primary Metals	2.5
10 Agriculture & Livestock	2.1

\*China includes Hong Kong, Taiwan, and Macao.

*Pages 1 - 3:* County unemployment rates typically lag state data releases by one month. Gray bars show recessionary periods as designated by the National Bureau of Economic Research. The "official" and most commonly reported unemployment rate is calculated as the number of unemployed workers divided by the total civilian labor force. These data are reported from the Bureau of Labor Statistics Current Population Survey, or commonly called the "Household" survey.

*Page 4:* Nonfarm employment data from the Bureau of Labor Statistics Current Employment Survey are commonly called "Payroll" employment data. Estimates from this survey are revised throughout the year and a major revision or "benchmark" of the data occurs in March of each year. "Payroll" and "Household" surveys are released monthly, providing the most current estimates of employment published by the Bureau of Labor Statistics. Because methodologies differ between surveys, employment estimates also differ. For more information, visit:

[http://www.bls.gov/web/empst/ces\\_cps\\_trends.pdf](http://www.bls.gov/web/empst/ces_cps_trends.pdf)

Initial claims show monthly applications for initial claims for state unemployment insurance benefits.

*Pages 5 and 6:* Payroll employment by industry is shown for each of the major two-digit North American Industrial Classification System industries.

*Page 7:* Personal income provides a measure of all income received by residents of a given geographic area. Data shown are in nominal terms (not adjusted for inflation). Transfer payments include social benefits such as unemployment insurance, Social Security, and Medicaid. Contributions to social insurance are subtracted from personal income. These contributions include taxes paid by businesses and employees that support social insurance programs such as unemployment insurance, Social Security, and Medicaid. The residence adjustment adds income received outside of a recipient's state of residence and makes a corresponding subtraction from the area where this income was earned or received. Real average hourly wages are calculated as total earnings divided by total employment for a given geographic area. Data are adjusted for inflation using the consumer price index for all urban areas (CPI-U) and are indexed to the most current month of data.

*Page 8:* Home price indices estimate regional growth in home values based on repeat sales data for detached single family residential properties. Monthly single and multifamily housing permits data are not revised, and therefore, may not sum to published year-end totals.

*Page 9:* The active rig count is the number of rigs actively exploring for or developing oil or natural gas. Rig counts provide an indicator of new drilling activity and potential for expanded crude oil or natural gas production. Coal production is shown as production during a given month.

*Page 10:* Exports measure the total physical movement of a given product from the United States to a foreign country.

### Data Revisions

Most data are revised periodically to correct for errors and incorporate additional information as it becomes available. Data shown in this report are subject to change.

### Seasonal Adjustments

Most data are seasonally adjusted to remove variance caused by seasonal fluctuations in economic activity. Data in this report show the seasonal adjustments of data publishers where available. In other cases, Census X-12 adjustments were applied.
