GROWTH IN TENTH DISTRICT MANUFACTURING ACTIVITY EDGED HIGHER Federal Reserve Bank of Kansas City Releases July Manufacturing Survey

KANSAS CITY, Mo. The Federal Reserve Bank of Kansas City released the July Manufacturing Survey today. According to Chad Wilkerson, vice president and economist at the Federal Reserve Bank of Kansas City, the survey revealed that growth in Tenth District manufacturing activity edged higher, and producers' optimism for future activity increased.

"Factories in our region reported slightly faster growth in July," said Wilkerson. "In addition, future hiring and capital spending plans were the highest in six months."

A summary of the July survey is attached. Results from past surveys and release dates for future surveys can be found at www.kansascityfed.org/research/indicatorsdata/mfg.

The Federal Reserve Bank of Kansas City serves the Tenth Federal Reserve District, encompassing the western third of Missouri; all of Kansas, Colorado, Nebraska, Oklahoma and Wyoming; and the northern half of New Mexico. As part of the nation's central bank, the Bank participates in setting national monetary policy, supervising and regulating numerous commercial banks and bank holding companies, and providing financial services to depository institutions. More information is available online at www.kansascityfed.org.

###

TENTH DISTRICT MANUFACTURING SUMMARY

Growth in Tenth District manufacturing activity edged higher in July, and producers' optimism for future activity increased. Several firms continued to note difficulties with retaining certain types of workers, particularly machinists and welders. Price indexes were mixed, with most recording little change from the previous month.

The month-over-month composite index was 9 in July, up from 6 in June but slightly lower than 10 in May (Tables 1 & 2, Chart). The composite index is an average of the production, new orders, employment, supplier delivery time, and raw materials inventory indexes. The growth in manufacturing activity occurred mostly at durable goods-producing plants, particularly machinery products, while nondurable goods-producers reported fairly flat activity. Most other month-over-month indexes also increased. The production index climbed from 2 to 11, and the shipments, new orders, and employment indexes also rose considerably. In contrast, the order backlog index fell into negative territory for the first time in four months. Both inventory indexes were basically unchanged.

Year-over-year factory indexes were mixed. The composite year-over-year index moderated somewhat from 15 to 13, and the new orders and order backlog indexes also edged lower. The capital expenditures index fell from 19 to 10, its lowest level in nine months, and the new orders for exports index slipped from -2 to -3. In contrast, the production, shipments, and employment indexes moved slightly higher. The finished goods inventory index decreased from 7 to 0, and the raw materials inventory index also eased.

Future factory indexes increased slightly from last month. The future composite index edged up from 12 to 15, and the future production, shipments, new orders, and order backlog indexes also rose. The future employment index jumped from 14 to 23, its highest level in six months, and the future employee workweek index reached nearly a five-year high. The future capital expenditures index grew for the second straight month, while the future new orders for exports index remained unchanged. Both future inventories indexes fell into negative territory.

Price indexes were mixed after easing last month. The month-over-month raw materials price index edged down from 25 to 19, while the finished goods price index moved slightly higher. The year-over-year finished goods price index rose from 30 to 37, but the raw materials price index was basically unchanged. The future raw materials price index eased from 49 to 46, and the future finished goods price index also edged lower, indicating fewer firms plan to pass recent cost increases through to customers.

SELECTED COMMENTS

"Competition for qualified professionals is intense. We are challenged to find high quality experienced professionals, particularly truck drivers."

"We are having trouble filling shop jobs on the off shifts."

"Cattle numbers in the feed yards are beginning to decrease rather rapidly. Recent rains in the central and southern plains may encourage the first increase in retained heifers in 10 years in this area. Looking forward to 2015, volume is expected to be down sharply."

"The strength of the oil and gas industries have impacted us in both increasing our cost of doing business (labor costs) and the availability of labor (much tighter). Additionally, the increase in energy cost is impacting us with 10 percent increases."

"Very strong month in sales. Customers are already purchasing for fall and winter."

"We added yet another product line in order to bolster sales and cash flow. The local economy is still lagging."

"Demand continues at a brisk pace with so signs of let up in sight. We are adding manufacturing capacity as swiftly as we can to support demand."

"Our sales are slowly increasing. We would like to see better increases, but are thankful for anything."

"We are experiencing a summer slump."

^{*}Percentage may not add to 100 due to rounding

Note: The July survey included 93 responses from plants in Colorado, Kansas, Nebraska, Oklahoma, Wyoming, northern New Mexico, and western Missouri.

Composite Index vs. a Month Ago

[^]Diffusion Index. The diffusion index is calculated as the percentage of total respondents reporting increases minus the percentage reporting declines.

^{*^}Seasonally Adjusted Diffusion Index. The month vs. month and expected-in-six-months diffusion indexes are seasonally adjusted using Census X-12.
